

Managing Health & Safety on construction sites

It`s all about leadership!

Did you know that:

As many people die on construction sites throughout the world each year as are killed in armed conflict

Accidents happen?

or

Are they caused?

Accidents are caused

therefore

**All
accidents
are
preventable**

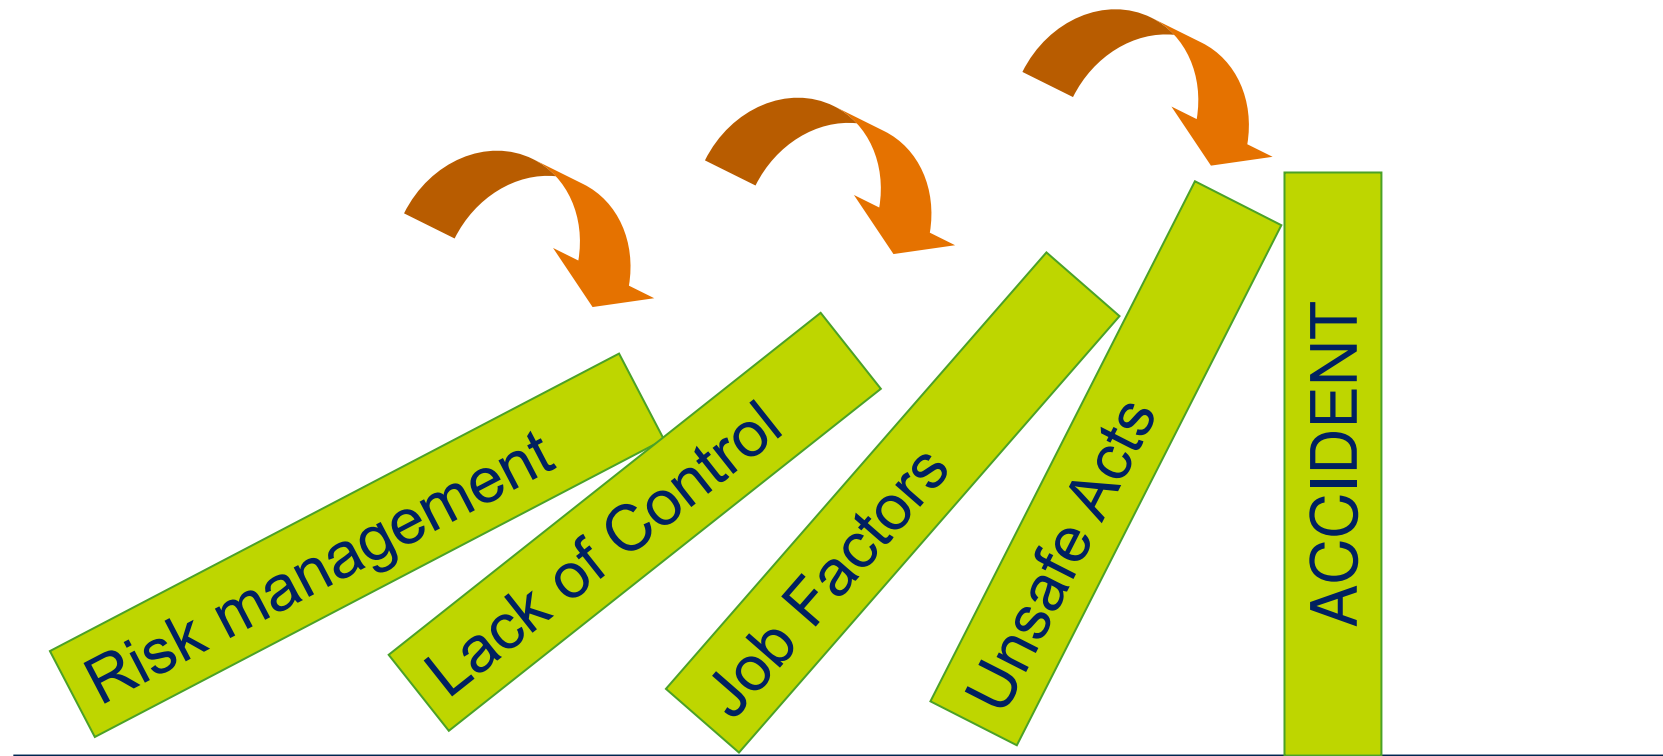

Accident Causation – Domino Theory

root
causes

intermediate
causes

basic
causes

immediate
causes

The Accident Triangle

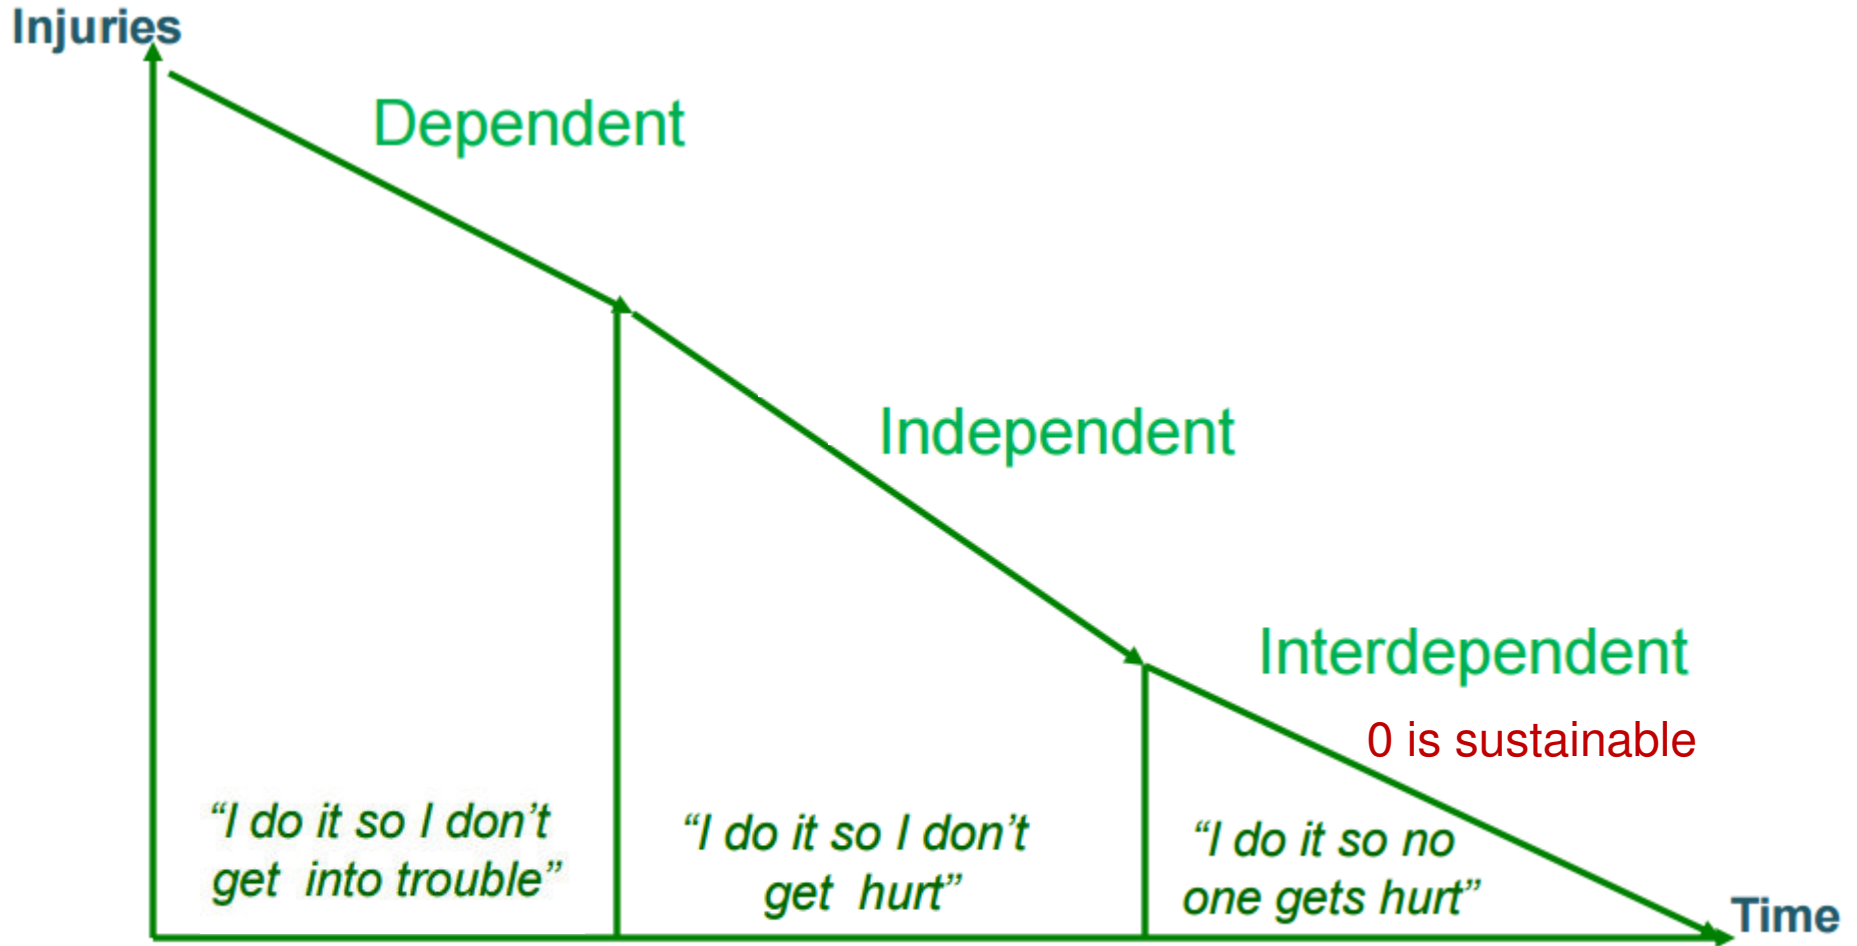

Behaviours are a significant cause of **>80%** of construction industry accidents.

Whose behaviour?

Bradley Curve

Some of the tools we use

- Inductions for everyone working on our sites
- Trainings
- Risk assessments
- ESSVs
- Simulations & drills
- Safety Week

Skanska Safety Week

Our way of thinking concerning H&S

Health& Safety is not something we do to our workforce, it is something we do **together** for the benefit of **each other**.

Make Health & Safety personal, look out for each other, show safety leadership.

SKANSKA

Thank you!
